QUALITY

FASHION STYLES

FAST

Vi.Be.Mac. has developed its own loopsetter unit keeping always the focus on the flexibility, creating a unit able to satisfy many different style requirements. The 4650EV9@UP3 can work on classic, semi classic, inserted, double loop and can perform a fully customizable bartack. In terms of quality, the unit is equipped with latest patented technologies for a perfect aligned loop, a V cut of the loop, a long last of the cutting system and the maximum comfort for the operator.

### ▷ DOUBLE COMPENSATORY PRESSER FOOT

Extra pressure also on multiple layers of fabric, less flexure, besides a lower barycenter

### ▷ LOOP ALIGNMENT SYSTEM

To avoid the loop mispositioning on the fabric, especially for the folded tails (Q loop / 3D loop); the loops are always perfectly aligned, allowing the operator to work fast without the need to center every loop

### ▷▷ REVOLVING SYSTEM FOR DEVICES POSITION

Devices can be set in 4 preset positions with a quick revolving system; downtime greatly reduced
